

Member Slideshow Info

We have a slideshow of images during the last 15 minutes of every meeting. Members are encouraged to bring up to 5 photos on a thumb drive to club meetings to share. It's a fun way to see other peoples' photos and get ideas of places that are fun and beautiful to photograph.

For best viewing results, your photo should be resized to:

- 1920 pixels long edge (the short edge dimension is unimportant)
- JPG at 100% quality
- sRGB color space
- 72 ppi (Lightroom and some other software requires a number, so use this)
- 5 image limit

Why Resize:

Resizing allows the images to display quickly.. Consistent file format and size is important as we get more cameras with extremely high resolution and large file size, which really slows the display process down. If you are not sure how to do this resize, please ask us and we will help.
